STREAMLINE APP - VISUAL FEATURE WALKTHROUGH

Document Purpose: Visual guide showing exactly how the StreamLine app looks and functions
Date: February 6, 2026
Version: 1.0

TABLE OF CONTENTS

1. App Overview & Navigation
2. Onboarding Experience
3. Home Feed (Main Screen)
4. Priority Queue
5. Content Types & Cards
6. Article Reading Experience
7. Video Watching Experience
8. Newsletter View
9. **Unified Messages Hub (NEW)**
10. Search & Discovery
11. Read Later Queue
12. Source Management
13. Settings & Profile
14. Premium Features
15. Gestures & Interactions

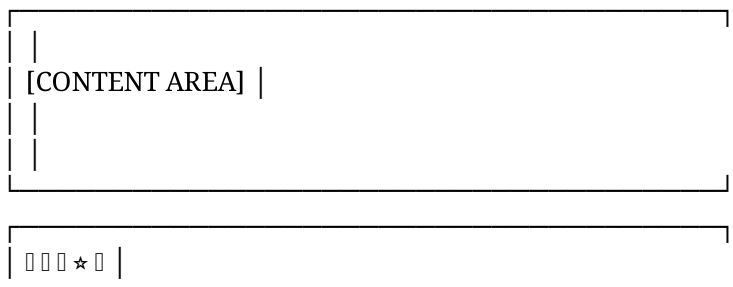

---

1. APP OVERVIEW & NAVIGATION

Core Layout Philosophy

Single-Handed Usability: All primary actions accessible with thumb
Clean Interface: 80% content, 20% UI chrome
Dark Mode First: Designed for night reading, light mode as variant

Bottom Navigation Bar (Always Visible)

```
│ Home Messages Search Saved Profile │
└──────────────────────────────────────────────────────┘
```

Tab Descriptions:

- **Home (□):** Main feed with Priority Queue + all content
- **Messages (□):** Unified inbox for YouTube comments, Reddit replies, podcast Q&As, newsletter replies
- **Search (□):** Universal search across all sources
- **Saved (★):** Read Later queue + archived items
- **Profile (□):** Settings, sources, account, stats

---

2. ONBOARDING EXPERIENCE

Step 1: Welcome Screen

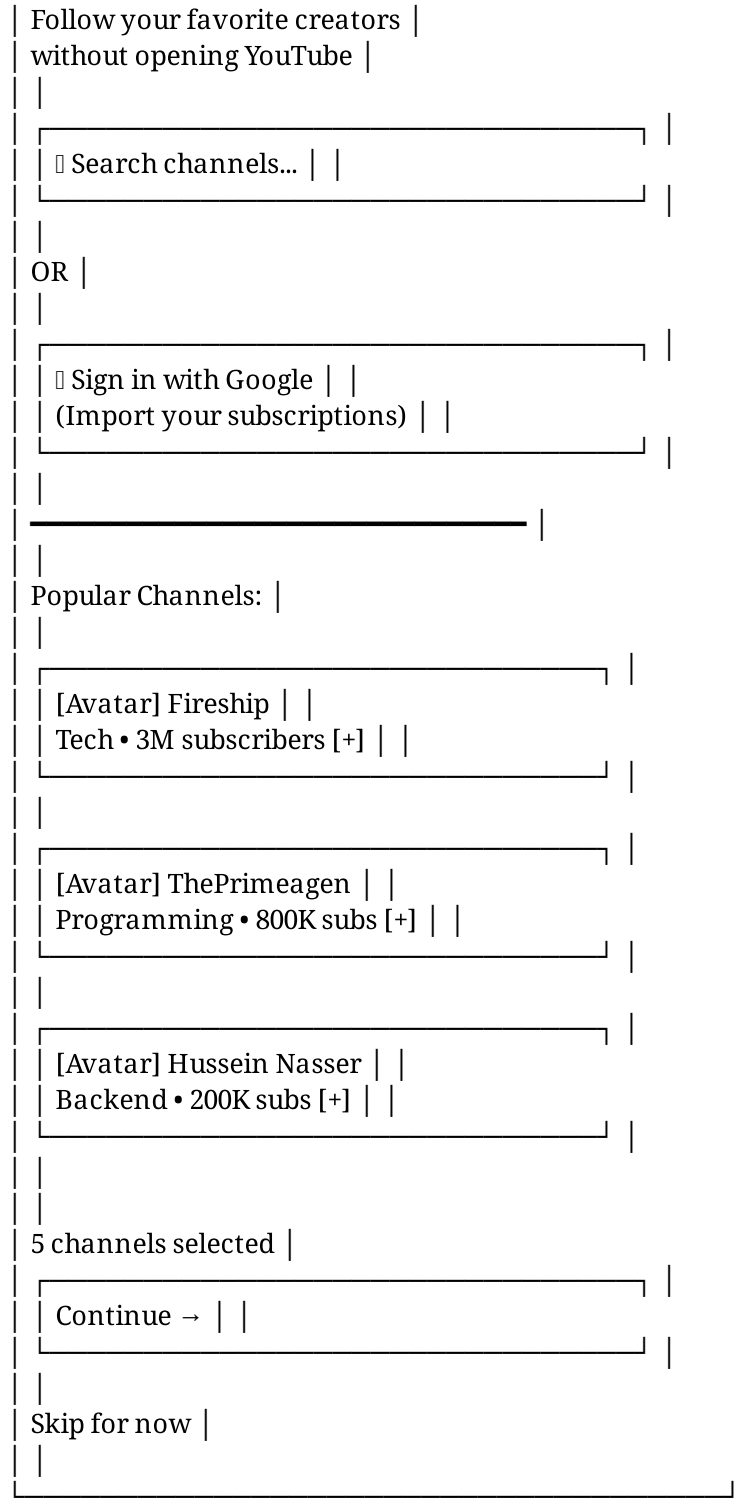

```
┌──────────────────────────────────────────────────────┐
│                                                      │
│ [StreamLine Logo] │
│                                                      │
│ Transform Content Chaos │
│ Into Curated Clarity │
│                                                      │
│ [Illustration: Messy apps → One │
│ clean feed] │
│                                                      │
│                                                      │
│ ┌──────────────────────────────────────────┐ │
│ │ Get Started → │ │
│ └──────────────────────────────────────────┘ │
│                                                      │
│ Already have an account? Sign In │
│                                                      │
└──────────────────────────────────────────────────────┘
```

Key Elements:

- Large, bold value proposition
- Visual showing transformation (chaos → clarity)
- Single primary CTA (Get Started)
- Secondary sign-in link

Step 2: Connect YouTube Channels

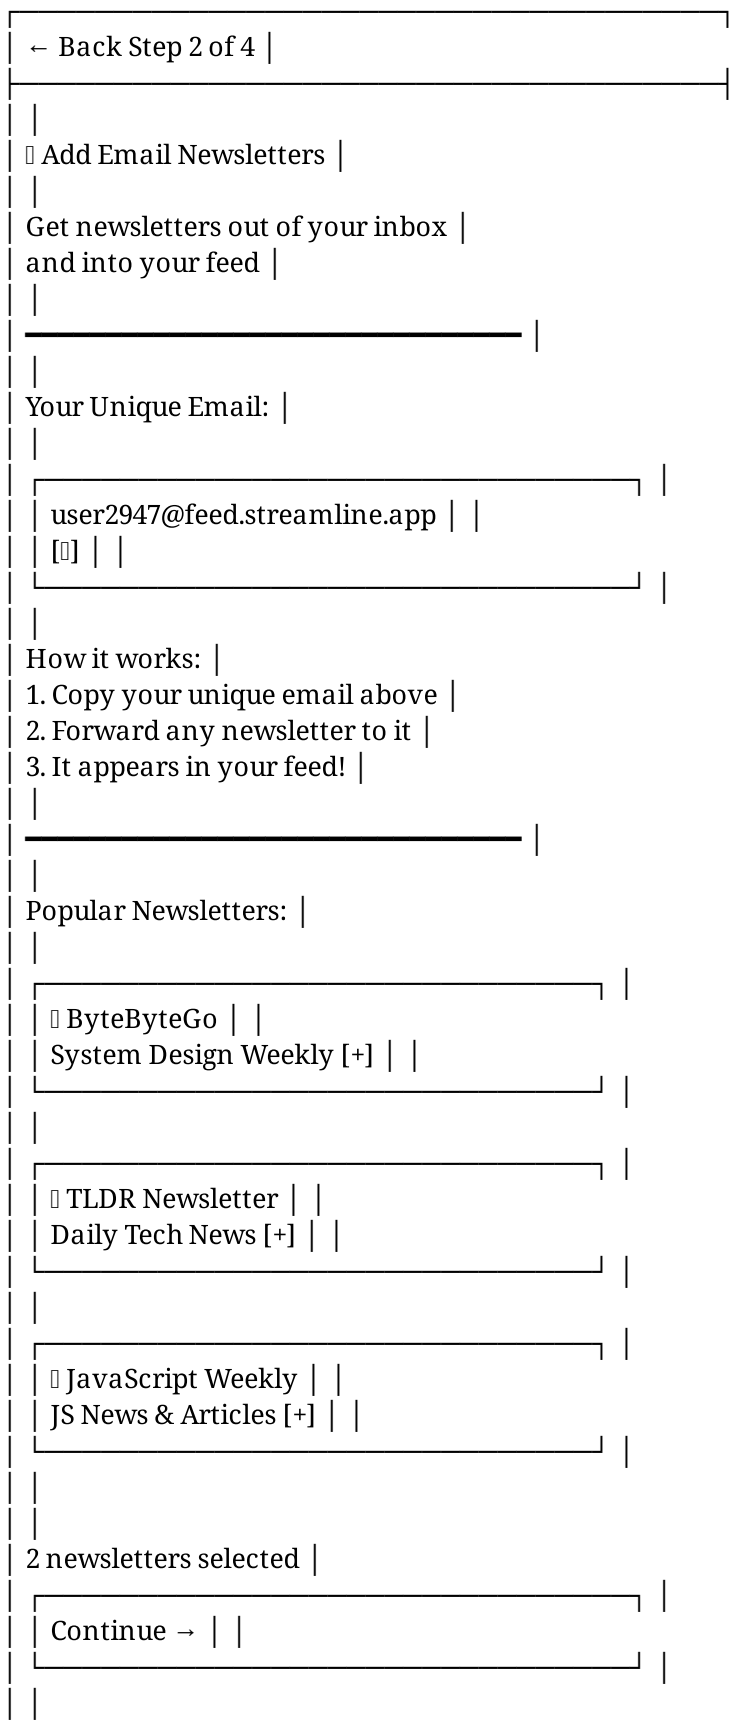

```
┌──────────────────────────────────────────────────────┐
│ ← Back Step 1 of 4 │
├──────────────────────────────────────────────────────┤
│                                                      │
│ □ Connect YouTube Channels │
│                                                      │
```

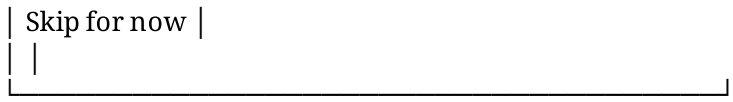

Features:

- Two methods: Manual search OR Google OAuth import
- Pre-populated popular channels (based on user's likely interests)
- Selected count + ability to skip
- Instant add with [+] button

Step 3: Add Newsletters

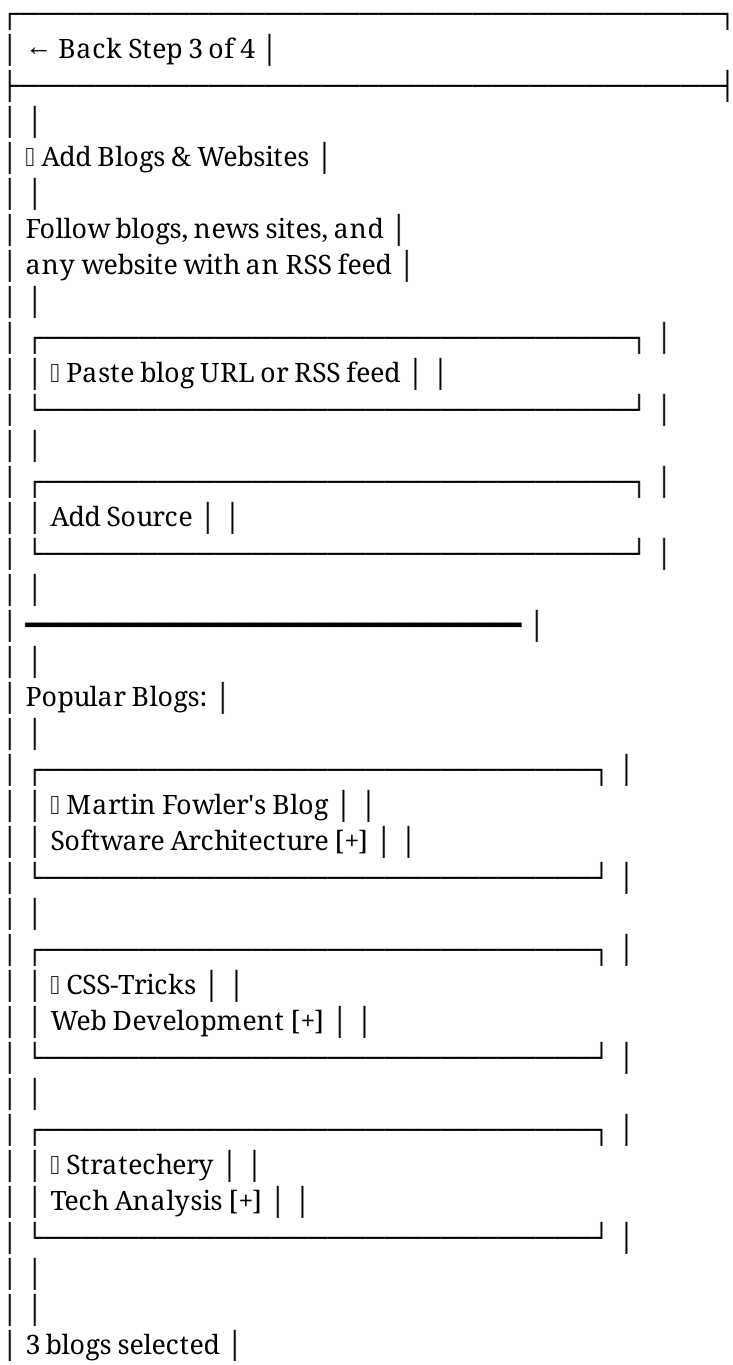

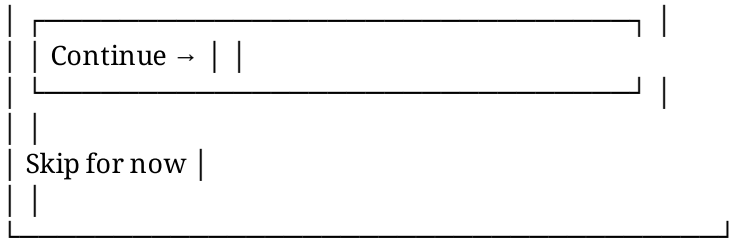

Key Innovation:

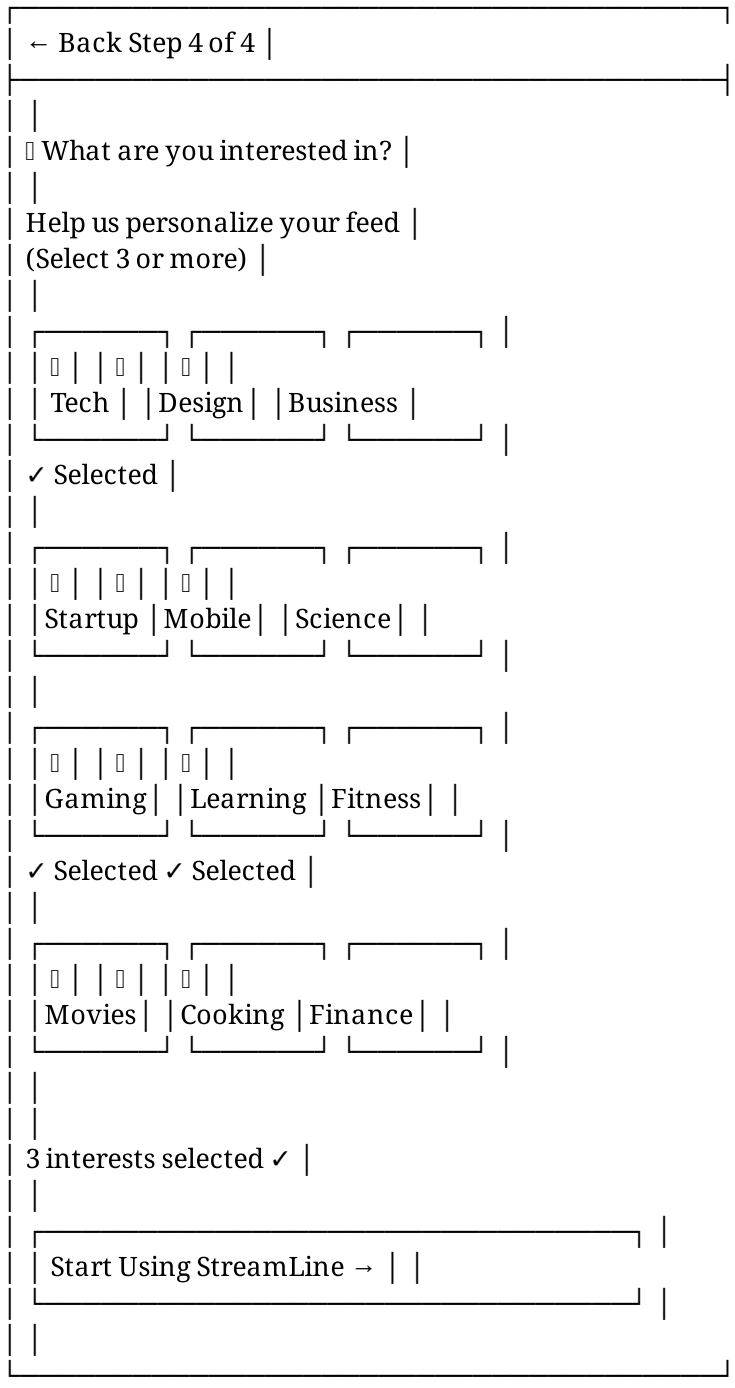

- Unique forwarding email address (no manual newsletter entry!)
- Clear 3-step instructions
- One-tap copy email to clipboard
- Ability to subscribe to popular newsletters directly

Step 4: Add Blogs & RSS Feeds

Step 5: Choose Interests

Purpose:

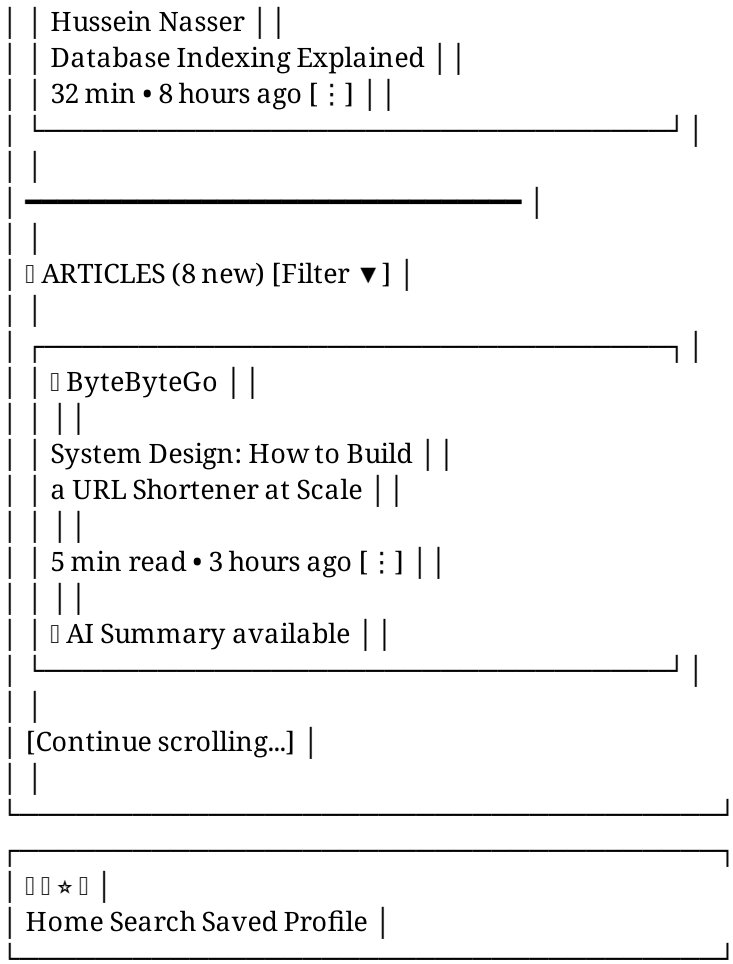

- Initial data for AI recommendation engine
- Visual, tap-to-select interface
- Minimum 3 selections required
- Finishes onboarding with clear CTA

---

3. HOME FEED (MAIN SCREEN)

Full Home Screen Layout

```
┌─────────────────────────────────────────────────┐
│ ☰ StreamLine [ 23] [⚙] │ ← Header
├─────────────────────────────────────────────────┤
│ │

│ └─────────────────────────────────────────┘ │
│ │
│ ┌─────────────────────────────────────────┐ │
│ │ [████████████████] 32:11 │ │
│ │ │ │
```

Header Bar Elements

Left Side:

- ☰ **Menu:** Opens drawer with sources, settings, help
- **StreamLine Logo/Text:** Tap to scroll to top

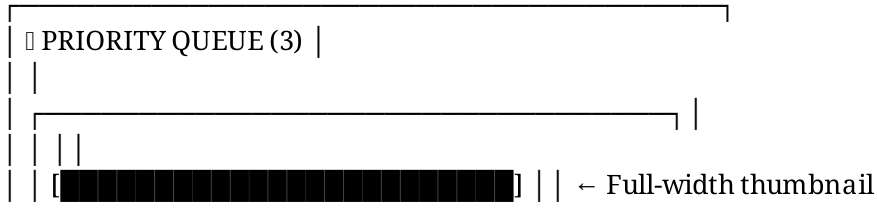

Right Side:

- **Notifications (23):** New content count badge
- ⚙ **Settings:** Quick access to preferences

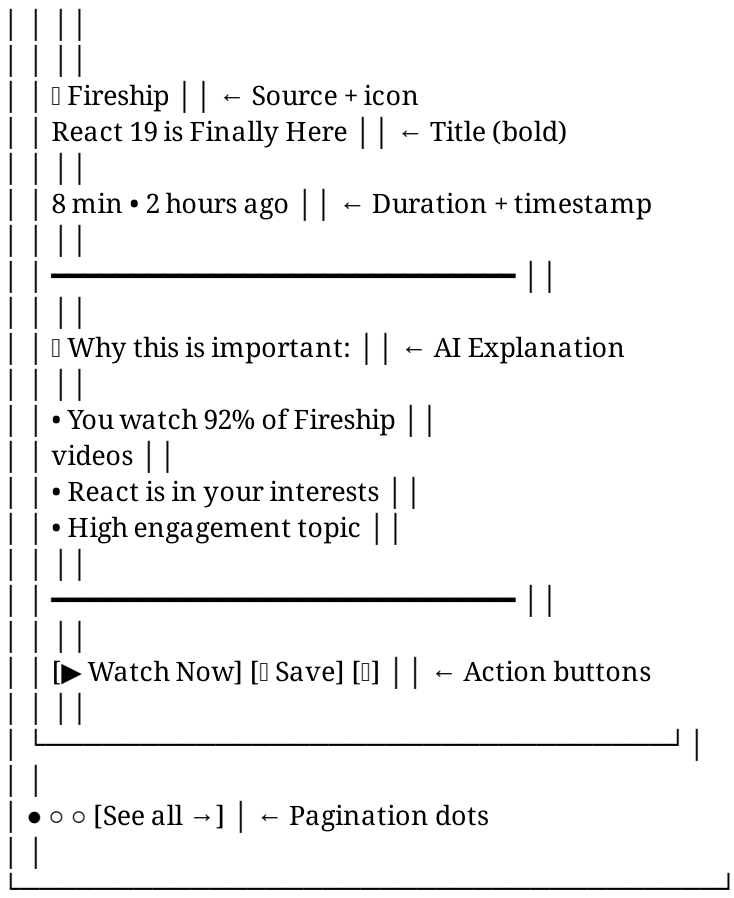

---

4. PRIORITY QUEUE (DETAILED)

Priority Card - Expanded View

← Full-width thumbnail

Priority Queue Rules:

- Maximum 5 items at a time
- Updated every hour based on user engagement
- Swipeable carousel (left/right navigation)
- Explicit reasoning shown (AI transparency)
- User can downvote to improve recommendations

Priority Explanation Types

Engagement-based:

> "You watch 90%+ of this creator's videos"

Time-sensitive:

> "Posted 1 hour ago (you prefer fresh content)"

Interest-matched:

> "Matches your interests: JavaScript, Web Dev"

Trending:

> "Popular in the StreamLine community (50K views)"

Continuation:

> "Part 2 of a series you watched"

---

tech-blog.com
AI SUMMARY (Read in 1 min)
[▼]
← Expandable summary
[Tap to expand AI summary]
Introduction
← Article content
(clean, readable)
URL shortening is a technique to
create shorter aliases for long
URLs. When users access the short
URL, they're redirected to the
original long URL.
This article explores how to design
a scalable URL shortener like
bit.ly or TinyURL.
Key Requirements
1. Functional Requirements
• Generate unique short URLs
• Redirect to original URL
• Custom short URLs (optional)
2. Non-Functional Requirements
• High availability (99.99%)
• Low latency (< 100ms)
• Scalable (100M URLs/day)
[Article continues...]
Reading Progress: 35%
← Progress indicator
[Listen] [Save] [✓ Mark Read]
← Bottom actions

AI Summary - Expanded

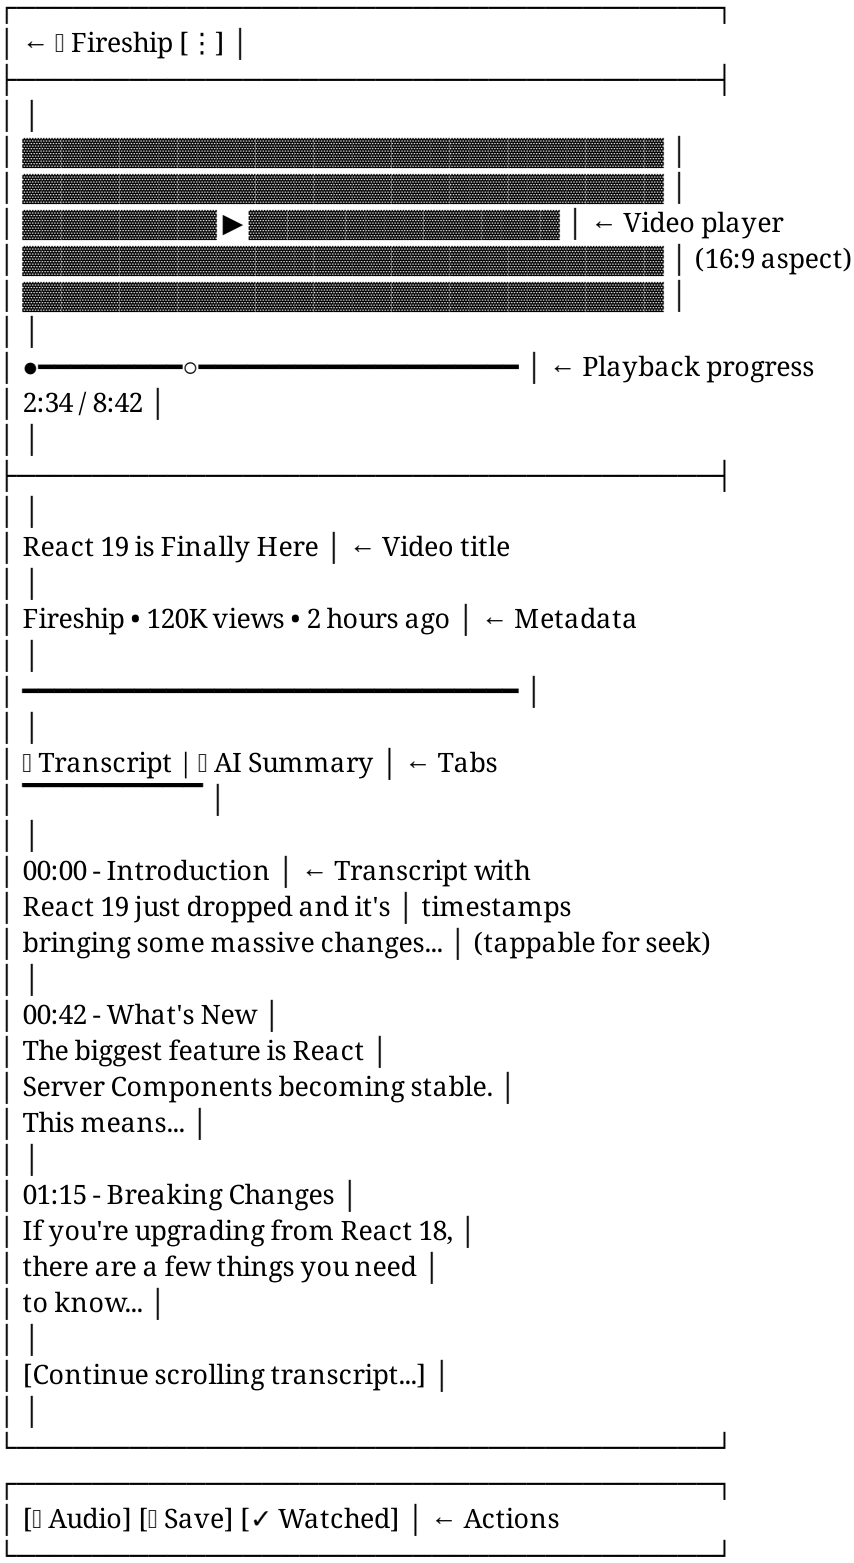

Summary Features:

- Bullet points for scannability
- Key quotes extracted
- Estimated time savings shown
- Clear CTA to read full article

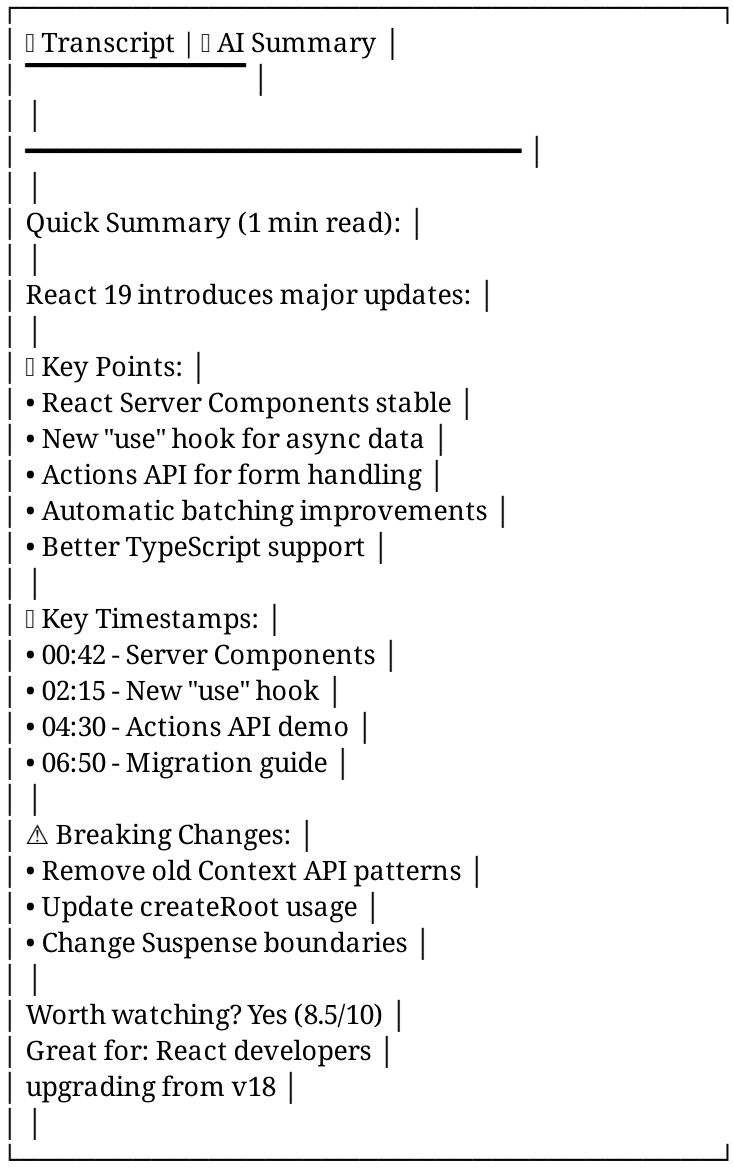

---

7. VIDEO WATCHING EXPERIENCE

Video Player View

Video Summary Tab

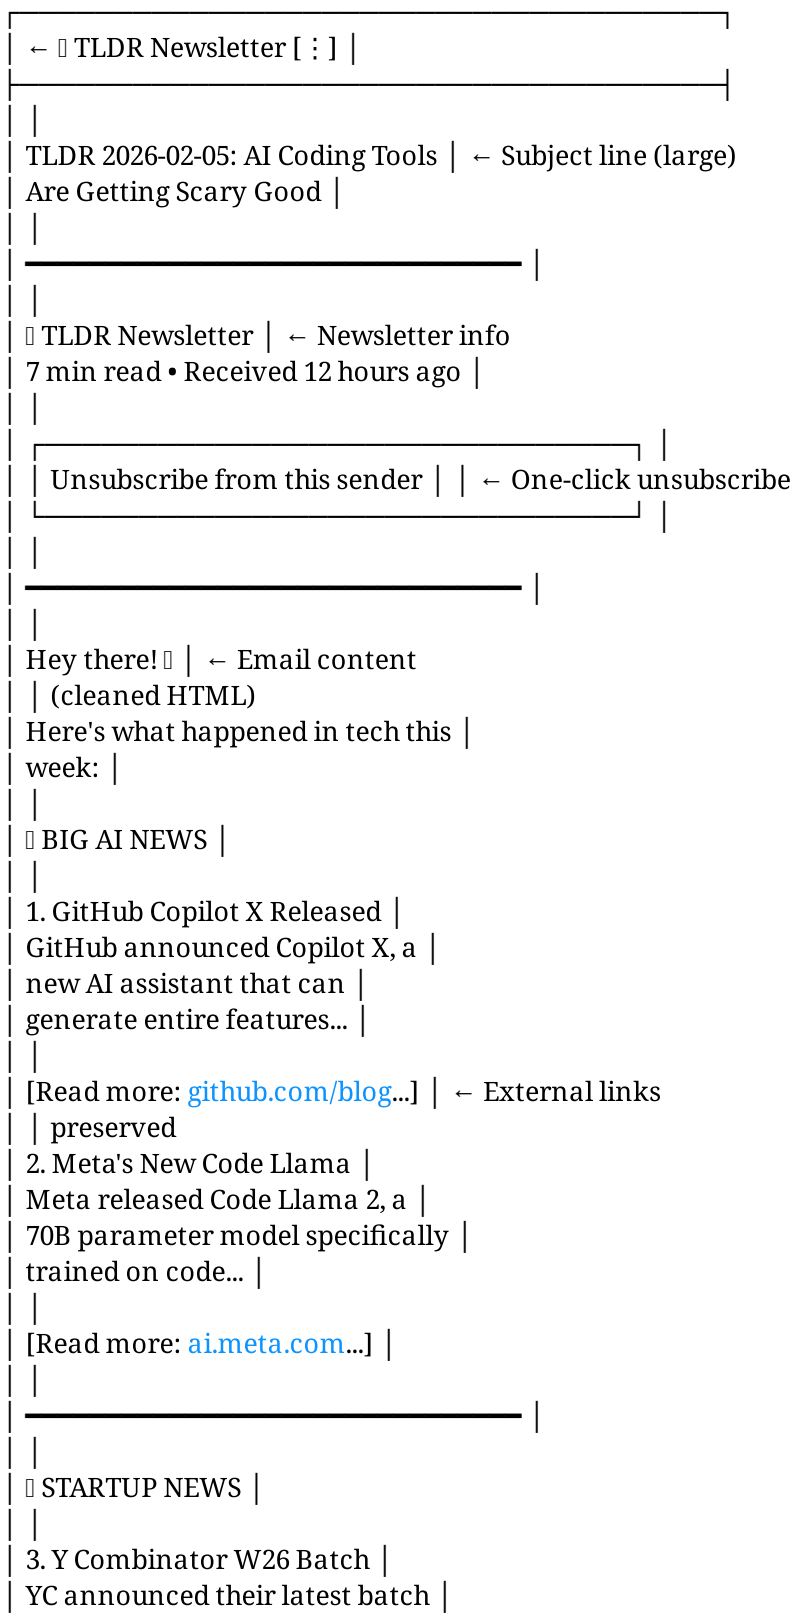

Video Features:

- Native video player (plays in-app, not YouTube redirect)
- Transcript with timestamps (tap to jump)
- AI summary with key points + timestamps
- Audio-only mode (convert to podcast-style)
- Playback speed control (0.5x - 2x)

---

8. NEWSLETTER VIEW

Newsletter Reading Screen

```
│ with 300 startups, heavy focus │
│ on AI infrastructure... │
│ │
│ [Continue reading...] │
│ │
└──────────────────────────────────────────────────┘

┌──────────────────────────────────────────────────┐
│ [ Open Links] [ Save] [✓ Read] │
└──────────────────────────────────────────────────┘
```

Newsletter Features:

- Clean HTML parsing (removes tracking pixels, clutter)
- One-click unsubscribe (no need to open Gmail)
- Preserves formatting (headings, lists, images)
- External links open in in-app browser
- Link extraction: "Open Links" shows all URLs in newsletter

---

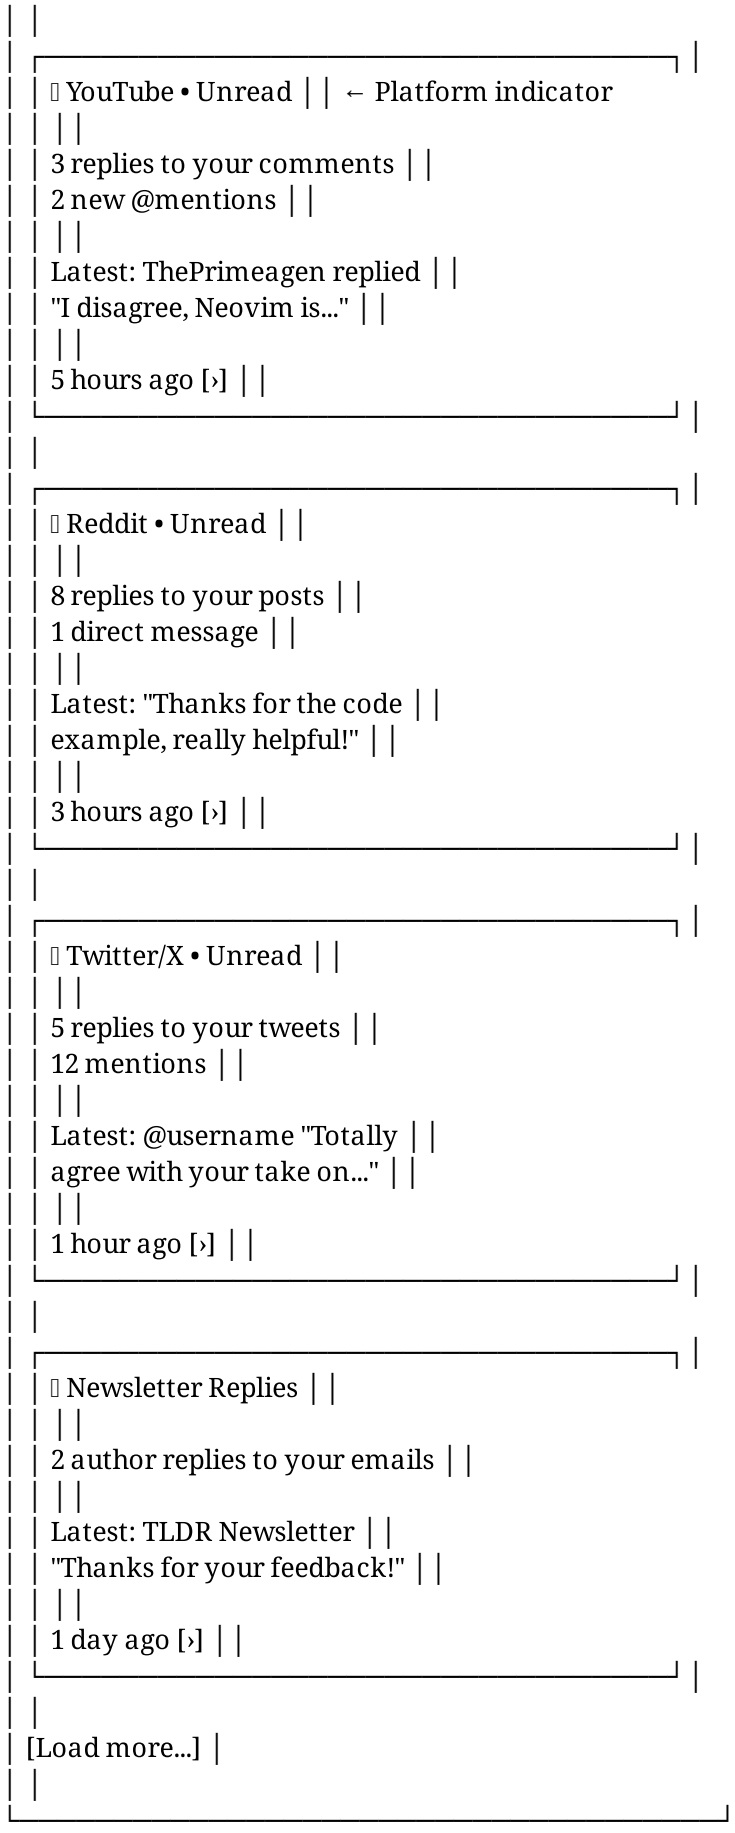

9. UNIFIED MESSAGES HUB

Messages Tab Overview

The **Messages Hub** consolidates all your social interactions from connected platforms into a single, unified inbox. No more switching between YouTube, Reddit, Twitter, or email to check replies and mentions.

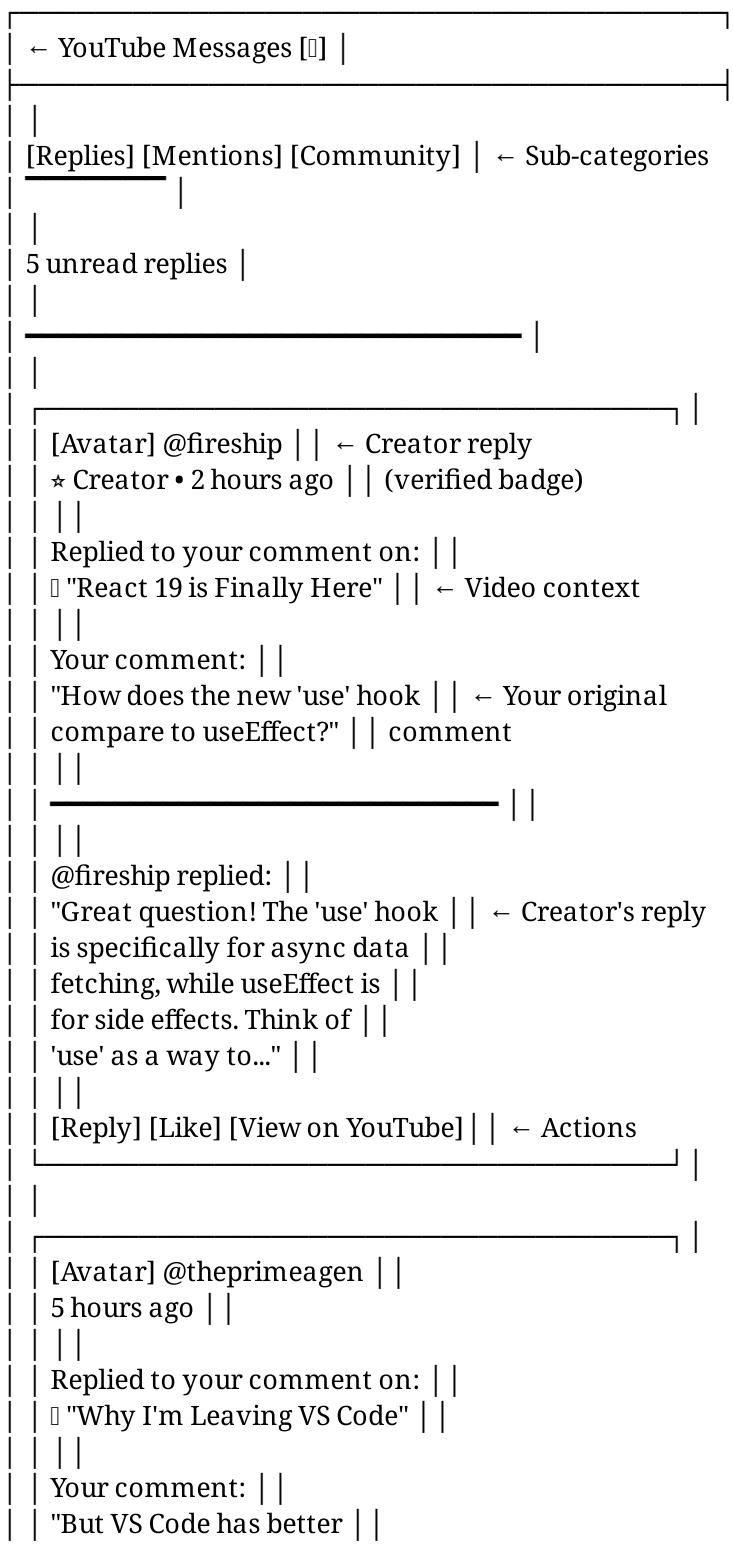

Messages Home Screen

```
┌──────────────────────────────────────────────────┐

Message Notifications Badge

```
┌──────────────────────────────────────────┐
│ ⋆ │
│ Home Messages Search Saved Profile│
│ 23 │ ← Unread count badge
└──────────────────────────────────────────┘
```

Badge behavior:

- **Red badge:** Unread messages present
- **Number:** Total unread count across all platforms
- **Pulse animation:** New message just arrived
- **Priority indicator:** Gold dot for creator/important replies

Key Messages Features Summary

Platform Coverage

✓ **YouTube:** Comments, replies, mentions, community posts
✓ **Reddit:** Post replies, comment replies, DMs, mentions, modmail
✓ **Twitter/X:** Replies, mentions, DMs, quote tweets
✓ **Newsletters:** Author replies when you email back
✓ **Podcasts:** Host Q&A replies, community discussions
✓ **Blog Comments:** If blog has commenting system (Disqus, etc.)

Smart Features

 AI Priority: Important messages (creator replies, job offers) surfaced first
 Smart Notifications: Only notify for high-value interactions
 In-App Replies: Respond without leaving StreamLine
 Message Search: Find old conversations across all platforms
 Reply Analytics: See response rates, engagement stats (Premium)
⚡ **Quick Replies:** AI-suggested responses to save time (Premium)

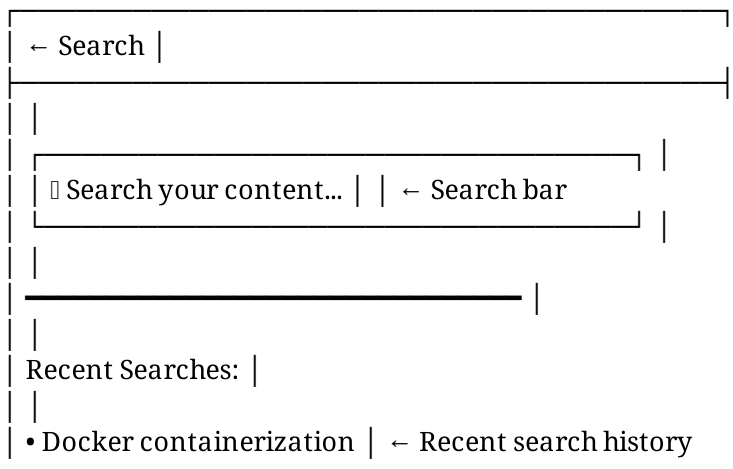

Privacy & Security

 OAuth 2.0: Secure authentication, never store passwords
 Read-only by default: Only write access when you explicitly reply
 Encrypted storage: All messages encrypted at rest
 No data selling: Your messages are private
✓ **Mark as read sync:** Optional two-way sync with platforms

---

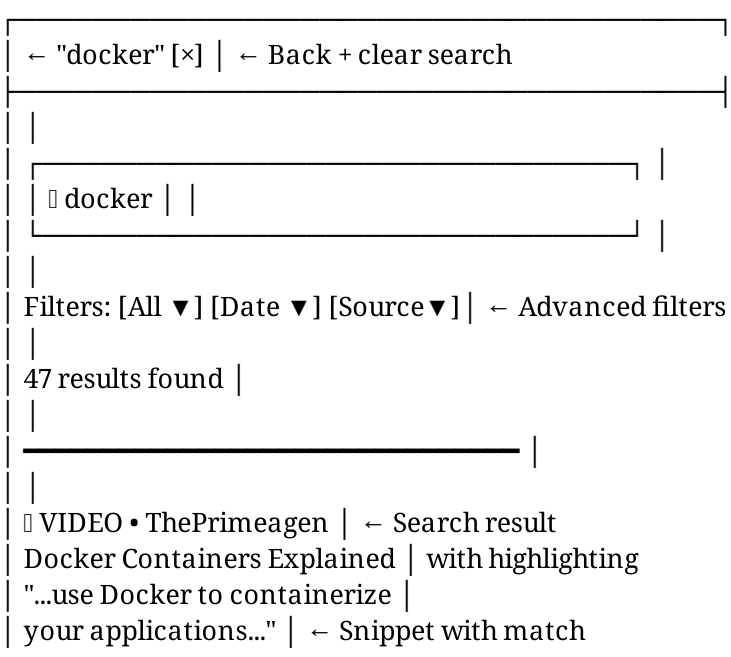

10. SEARCH & DISCOVERY

Universal Search Screen

Search Results

Headings: Inter (Bold, 600 weight)

- H1: 28px
- H2: 24px
- H3: 20px
- H4: 18px

Body: System fonts (SF Pro on iOS, Roboto on Android)

- Regular: 16px
- Small: 14px
- Caption: 12px

Reading Font (Articles): Georgia (Serif) or System Sans

- Size: 18px (adjustable 14-22px)
- Line height: 1.6

Spacing System

Base unit: 8px

- Tiny: 4px
- Small: 8px
- Medium: 16px
- Large: 24px
- XLarge: 32px
- XXLarge: 48px

Component Patterns

Card Shadow

box-shadow: 0 2px 8px rgba(0, 0, 0, 0.08);

Border Radius

- Cards: 12px
- Buttons: 8px
- Input fields: 6px
- Avatars: 50% (circular)

Animations

- **Transition duration:** 200ms
- **Easing:** cubic-bezier(0.4, 0.0, 0.2, 1)
- **Hover scale:** 1.02
- **Active scale:** 0.98

16. SUMMARY: KEY SCREENS OVERVIEW

Primary User Flows

Flow 1: Quick Content Consumption

1. Open app → **Home Feed**
2. See **Priority Queue** (3 AI-recommended items)
3. Tap priority item → Read **AI Summary**
4. Decide: Read full article OR mark as read
5. Swipe to next item

Time: 30 seconds per item

Flow 2: Discover & Save for Later

1. **Home Feed** → Browse videos/articles
2. Long press interesting item → Quick preview
3. Swipe left → **Save to Read Later**
4. Continue browsing
5. Later: **Saved Tab** → AI suggests what to read next

Time: 1-2 minutes browsing

Flow 3: Search Specific Topic

1. **Search Tab**
2. Type query (e.g., "Docker")
3. Filter by type (Videos only)
4. Tap result → Read/watch
5. Related items suggested at bottom

Time: 2-3 minutes

Flow 4: Manage Sources

1. **Profile Tab** → Sources
2. View all 23 sources
3. Tap source → See stats (engagement, last updated)
4. Mute low-value sources
5. Add new source with [+] button

Time: 3-5 minutes

App Philosophy Summary

Core Principles:

1. **Speed:** Every screen loads in < 1 second
2. **Clarity:** No clutter, content is 80% of screen
3. **Intelligence:** AI works invisibly in background
4. **Trust:** Always explain WHY (priority reasoning, summaries)
5. **Delight:** Smooth animations, thoughtful gestures

Design Language:

- **Calm colors** (teal, not red) - Reduce anxiety
- **Generous spacing** - Easy to read, not overwhelming
- **Clear hierarchy** - Priority → Videos → Articles → Newsletters
- **Consistent patterns** - Same card design across types
- **Dark mode first** - Night reading is primary use case

CONCLUSION

This visual guide shows exactly how StreamLine will look and function. Every screen is designed for:

✅ **Single-handed use** (thumb-friendly)
✅ **Fast content consumption** (< 30 sec per item)
✅ **Smart AI integration** (visible but not intrusive)
✅ **Beautiful, calm interface** (reduce information anxiety)
✅ **Consistent patterns** (learn once, use everywhere)

Next Steps:

1. Create high-fidelity mockups in Figma (using this as blueprint)
2. Build interactive prototype for user testing
3. Validate with 20 beta users before development
4. Iterate based on feedback

Document Status: Feature Specification Complete
Ready for: Design Phase (Figma Mockups)
